For this Demake project i will be creating StarCitizen for the 6502 CPU on the NES.
This presentation will aim to address the Concept and Technical Feasibility of the game.

Concept

Game Concept

Concept

Game Concept

- The concept of my demake is a 2D space shooter, similar to Galaga but based on the modern game Star Citizen.

Concept

Game Concept

- The concept of my demake is a 2D space shooter, similar to Galaga but based on the modern game Star Citizen.
- The game will have a player ship at the bottom of the screen and will be able to fire projectiles at enemies that spawn at the top of the screen.

Technical Feasibility

Technical Feasibility

- This style of game has been done a few times on legacy game systems, so it should be very feasible.

Technical Feasibility

- This style of game has been done a few times on legacy game systems, so it should be very feasible.
- The game will have a detailed player sprite, consisting of 4 8x8 sprites, and the enemies will be just 8x8 sprites, with the exception of any bosses.
